New York City School Construction Authority (NYCSCA) engineers have been working with a few custom HVAC manufacturers to come up with the most efficient, long-lasting systems that a technology can offer for their schools. Seasons-4 is proud to be one of those preferred manufacturers.

The 202 ton unit will be built in two sections with all refrigeration piping in tact.

Twelve 15 ton Copeland scroll compressors,

2,800 MBH gas heat power burner with stainless steel heat exchanger.

A refrigeration piping masterpiece
