

# *Now In Production*

*APRIL 2005*

## **The Mall @ Short Hills located in Newark New Jersey.**

16 Roof top replacement units from 150 to 170 tons.

**Representative : Envirocon Associates, 4425 Fitch Ave Suit 112, Baltimore, MD 21236  
410-663-5900 P , Joe Driscoll, Mark Sheppard and Bill Marano**

The population is growing in every city in The United States. Malls are adding more small shops, food courts, and every 10 feet a KIOSK with computer, printer and one or two persons to operate the KIOSK.

The Mall's 15- year-old HVAC systems can not handle the added load. Tenants are complaining, and people are hot.

The solution?

Seasons-4 will review all existing unit wire sizes and provide a direct replacement to maximize the existing wires. This usually amounts to a 20 to 30% capacity increase for each unit. The change out starts on Sunday 6:00 pm after the mall is closed and continues till Monday morning.

At 10:00 AM when the mall is open the units are in operation with higher capacities and everyone is COOL.

New units are more efficient, with the latest technology control system and a choice of R-407c, R-134a, R-410a or R-22 refrigerant.
